

AQUAFIN®-2K/M

... takes a leading product to new heights. Based on 25 years of experience and the latest know-how, the time proven AQUAFIN-2K now has a successor: AQUAFIN-2K/Modified

The new modifications increase the performance of all major properties. Exceeding the stringent German DIBT requirements, AQUAFIN-2K/M sets a new standard for cementitious waterproofing.

AQUAFIN®-2K/M

The highly flexible waterproofing slurry for a wide range of applications:

- Concrete buildings and foundations
- Water, wastewater, marine and aquarium structures
- Stairs, ramps and driveways
- Balconies, terraces, roof structures and plaza decks
- Shower rooms, bathrooms, wet rooms, kitchens
- Swimming pools and decks
- Mechanical and equipment rooms

AQUAFIN®-2K/M

Offers the following advantages

- Easy application by hand or spraying
- Superior flexibility even at low temperatures
- Excellent abrasion resistance and crack bridging capabilities
- Economical and environment friendly
- Approved for potable water

Choosing **AQUAFIN®-2K/M** means counting on 25 years of experience and the latest research results.

The cutting edge of cementitious
waterproofing technology

AQUAFIN®-2K/M

SCHOMBURG

The SCHOMBURG GROUP, which includes SCHOMBURG, TEUTOBURG and RETHMEIER, is a national and international partnership for the production and distribution of high quality building product systems.

SCHOMBURG GmbH with its international partnerships focuses in the areas of

- Waterproofing and restoration
- Tile setting systems
- Industrial floor coating and water protection systems according to § 19 WHG (=water protection act)
- Coatings for water & wastewater structures

TEUTOBURG and RETHMEIER serve the market with products such as:
