# Crack Repair

Professional product systems and solutions

## Zip it!

Repair and restoration of  
wall, floor and ceiling cracks

## Our top products for effective crack repair

These restoration products provide applicators with effective yet simple methods to carry out crack repairs on wall, floor and ceiling cracks. Cracks can either be injected or poured to achieve rigid, elastic or watertight seals. With these options there is a solution for every application and choosing the correct method is easy. ASODUR®-K900 is a perfect example. This products unique packaging combines everything needed for the application, including disposable gloves and screed clips to securely seal cracks in cement based screeds, eliminating the hassle of finding extra tools.

### ASODUR®-K900 Highly fluid adhesive resin

2-comp. epoxy resin,  
solvent free.

- Provides a powerful bond and seal of cracks and joints in cement-based screeds and concrete.
- Used as a highly fluid adhesive resin for „stitching“ wide cracks in combination with screed clips.
- Includes disposable gloves and screed clips.
- Easy to use.

### GKH-24 Adhesive and repair resin

2-comp. polyester resin.

- Very versatile adhesive and repair resin for construction.
- Cold setting 2-comp. polyester resin with excellent adhesion to concrete, screeds, stone and ceramic.

### AQUAFIN®-P1 PU-injection resin

1-comp. PU-injection resin for  
sealing water-bearing cracks.

- Ready to use, foams quickly with high volume increase offering high resistance.

### AQUAFIN®-P4 PU-injection resin

2-comp. elastic PU-injection resin.

- Slow reaction time, hardens to a viscoelastic pore-free material.
- Can be applied with suitable injection pumps.
- Elastic crack injection via injection packers.
- Officially approved as a system in combination with AQUAFIN®-CJ1 and AQUAFIN®-CJ2 injection tubes.

### ASODUR®-IH Epoxy injection resin

2-comp. epoxy resin.

- Provides a powerful bonded sealing of cracks in concrete.
- Excellent adhesion inside cracks.

### Injection Packers

Injection packers for high pressure crack injection with epoxy resins.
